DETAILED ACTION

This Office Action is in response to the filing of the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Takaya et al. (U.S. Patent 5,428,885).

Takaya discloses a hybrid circuit (Fig. 4) that contains a mounting board (printed circuit board) having at least an insulated surface (18) with a plurality of conductive patterns (19), a hybrid integrated circuit (2 on right) having a conductive path (10) electrically connected to conductive patterns (19) and disposed on the mounting board, where a solder resist insulating film is formed on a surface of the hybrid circuit to insulate the conductive path from the conductive patterns, semiconductor element (2 on the left) coupled to the conductive paths by fine metal wires (12), at least one conductive path and conductive pattern in certain locations cross without making contact, semiconductor element, fine metal wires and conductive paths are integrally molded as a single package to be mounted on the mounting board and couple the conductive path to at least one of the conductive patterns.
